## 5th Annual

# Brain Tumors!

**Women's Ice Hockey Tournament**

**April 1-3, 2011**

**Union College's Messa Arena**

**Schenectady, NY**

Welcome Everyone - Players, Coaches, Referees, Friends and Family to the 5th Annual "Stick It To Brain Tumors" Women's Ice Hockey Tournament. The last four years, these tournaments far exceeded our goals - we raised over \$71,000 for pediatric brain tumor research. Few other diseases attack the very core of our being as directly as brain cancer and this terrible disease has gone without attention for far too long. Hopefully this tournament will help to raise awareness of this devastating disease that threatens the most vulnerable and innocent - our children.

**THANK  
YOU SO  
MUCH!**

Thank You to everyone who helped to make this fifth "Stick It To Brain Tumors" tournament a success. We cannot name everyone who helped but there were some people that were outstanding and must be mentioned. Thank you to **Adam Brinker**, who was instrumental in countless ways, obtaining the ice, promoting the tournament, coaching, cheering and simply being an energetic and wonderful human being. Thank you to **Kathy Zakriski**, an outstanding scrounger and tireless supporter, always going above and beyond to help. Thank you to **Grammie Petito**, who gave us determination and unflagging good cheer. Thank you to the **Mustangs** and their continued support! Thank you to the **Frozen Assets** who adopted our cause! A special thank you also goes to the **Capital District's USA Hockey referees** who graciously donated their time! We would like to thank the **teams and players** for adding life to the tournament, and to **Union College** for hosting us at the spectacular **Messa Rink**. And we thank all those that made donations and to our **Sponsors** who trusted us enough to support us financially year after year!

Thank You!

Debbie and Craig Jackson

## Facts about Brain Tumors\*

At this time, brain tumor research is underfunded and the public remains unaware of the magnitude of this disease. The cure rate for most brain tumors is significantly lower than that for many other types of cancer.

- ◆ Each year more than 200,000 people in the United States are diagnosed with a primary or metastatic brain tumor. Primary brain tumors comprise approximately 40,000 of these diagnoses.
- ◆ Metastatic brain tumors, cancer that spreads from other parts of the body to the brain, are the most common types of brain tumors. They occur in 10-15% of people with cancer. Primary brain tumors generally do not metastasize to other parts of the body.
- ◆ Brain tumors are the leading cause of solid tumor cancer death in children under the age of 20, now surpassing acute lymphoblastic leukemia (ALL). They are the second leading cause of cancer death in male adults ages 20-29 and the fifth leading cause of cancer death in female adults ages 20-39.
- ◆ There are over 120 different types of brain tumors, which make effective treatment complicated. They can be malignant or non-malignant, and in either case, can be just as injurious or life threatening. At present, the standard treatments for brain tumors include surgery, radiation therapy, and chemotherapy. These may be used either individually or in combination.
- ◆ There are currently no known causes of brain tumors, however, epidemiological studies are ongoing. Complete and accurate data on all primary brain tumors is needed to provide the foundation for investigations of its causes and research leading to improved diagnosis and treatment.
- ◆ Brain tumors have no socio-economic boundaries and do not discriminate among gender or ethnicity.
